WORK EXPERIENCE

Digital Data Analyst, Apprenticeship

Cheil France (Samsung) | Saint-Ouen, France | Nov 2024 to Sept 2026

- Built and managed 3 business dashboards (B2B, Home Appliances, Buying Guide) in Excel and Report Builder, with KPIs updated on a rolling basis to track Samsung commercial priorities.
- Created and maintained 50+ Adobe Analytics workspaces over 2 years, covering client requests, campaign tracking and product monitoring, each with custom segments and tailored KPIs.
- Ran performance analyses for 20+ marketing campaigns and 4 product launches, turning data into clear recommendations shared with the Samsung client team.
- Owned the full tracking framework for Samsung product launches: hourly and cumulative dashboards, live D-day monitoring and automated 7-day reporting.
- Audited and maintained 100+ tags in Adobe Launch, with JavaScript validation in test environments and end-to-end Jira workflow management.
- Presented the team's data tools at a Cheil x Samsung workshop in front of 50 people, including a live Adobe Analytics demo.

Business Developer and AI Trainer, Apprenticeship

AI Sisters | Paris, France | Sept 2024 to Nov 2024

- Ran 4 complete B2B GenAI training cycles from prospecting to invoicing, with direct contact with C-level stakeholders at Webedia and Voyages Confidentiels.
- Launched a daily AI newsletter reaching 100+ subscribers with a 60% average open rate, against a 25% industry benchmark.
- Deployed an n8n workflow to automate HR document management and contributed to testing and documentation of a custom AI chatbot.

Junior Product Manager, Internship

iExec | Lyon, France | Apr 2024 to Sept 2024

- Produced an independent Web3 market analysis (DeFi, DePIN, RWA) using on-chain data from Dune Analytics, feeding directly into product roadmap discussions with the CEO.
- Ran 15+ developer interviews in French and English to surface pain points, turning findings into product recommendations for Oracle Factory V2.
- Placed 3rd in a 2-day internal hackathon by building a Chrome extension enabling token-based service access, from idea to working prototype.
